

Table of Contents

<i>Nomenclature</i>	<i>xi</i>
<i>Hydraulic Laws, Theorems, and Equations</i>	<i>xii</i>

1 Introduction

<i>1.1 Component Design Perspective</i>	<i>1</i>
<i>1.2 Hydraulic Power Evolution</i>	<i>2</i>
<i>1.3 Hydraulic Applications</i>	<i>6</i>
<i>1.4 Component Design Rationale</i>	<i>8</i>
Design Considerations	<i>9</i>
<i>1.5 Why Computerized Component Design?</i>	<i>9</i>
Example of Relief Valve Design	<i>10</i>
Example of Electrohydraulic Servo Valve	<i>15</i>

2 Fundamental Fluid Power Engineering

<i>2.1 Introduction</i>	<i>19</i>
<i>2.2 Engineering System of Units</i>	<i>19</i>
<i>2.3 Behavior of Fluid in a System</i>	<i>23</i>
<i>2.4 Viscosity of Fluids</i>	<i>27</i>
<i>2.5 Pressure</i>	<i>30</i>
<i>2.6 Flow</i>	<i>33</i>
<i>2.7 Conduit Flow Models</i>	<i>35</i>
<i>2.8 Orifice Flow Models</i>	<i>37</i>
<i>2.9 Energy and Power</i>	<i>43</i>
<i>2.10 Design Safety Factors</i>	<i>44</i>
<i>2.11 Hydraulic Laws, Theorems, and Equations</i>	<i>46</i>

3 Linear Actuators

3.1	<i>Function and Configuration</i>	47
3.2	<i>Cylinder Nomographs</i>	48
3.3	<i>Hydraulic Cylinders</i>	52
	Cylinder Performance Model	55
3.4	<i>Hydraulic Cylinder Cushioning</i>	59
	Cylinder Cushioning Model	64
3.5	<i>Hydraulic Cylinder Design Considerations</i>	76
	Material Selection	77
	Cylinder Wall Thickness	77
	Diametral Expansion	80
	Cylinder Body Styles	80
	Cylinder Heads and Tie-rod	81
	Piston-Rod Diameter	83
3.6	<i>Hydraulic Cylinder Structural Integrity</i>	87
3.7	<i>Hydraulic Cylinder Dynamics</i>	99
3.8	<i>Hydraulic Cylinder Selection</i>	100
3.9	<i>General Selection Considerations</i>	104

4 Rotary Actuators

4.1	<i>Introduction</i>	107
4.2	<i>Hydraulic Rotary Motors</i>	110
	Positive Displacement Motor Model.....	112
4.3	<i>Hydraulic Motor Selection</i>	124
4.4	<i>Limited Rotation Actuators</i>	126
4.5	<i>Oscillating Motor Applications</i>	129

5 Fluid Distribution

5.1	<i>Fluid Distribution Function</i>	131
5.2	<i>Directional Control Valves</i>	133
	Directional Control Valve Selection Factors.....	140
5.3	<i>Check Valves</i>	142
	Direct Acting Check Valve Model.....	143
	Pilot Operated Check Valve Model	145
	Pilot Check Valve Application Study	147
5.4	<i>Shuttle Valves</i>	152
5.5	<i>Spool Valve Characteristics</i>	154
	Pressure-Flow Models.....	154

	Spool Lap Configurations	157
	Flow Gain.....	157
	Center Position Leakage	158
	Pressure Sensitivity	160
	Pressure-Flow Metering Characteristics.....	161
	Closed Center Spool Valve Model.....	161
	Open Center Spool Valve Model	162
	Motor (Float) Spool Valve Model	166
5.6	<i>Spool Valve Selection</i>	167
5.7	<i>Valve Design Considerations</i>	172
	Spool Valves	173
	Poppet Valves	175
	Flow Forces.....	177
5.8	<i>Solenoid Valves</i>	183
5.9	<i>Hydraulic Fuses and Circuit Protectors</i>	188

6 Pressure Regulation

6.1	<i>Pressure Regulation Function</i>	191
6.2	<i>Pressure Control Selection Factors</i>	193
6.3	<i>Relief and Safety Valves</i>	194
	Safety Valves	196
	System Protectors.....	196
	Direct Acting Relief Valves	197
	Differential Pressure Relief Valve	197
	Pilot-Operated Vent-Type Relief Valve.....	198
	Relief Valve Characteristics.....	199
	Cross-Port Relief Valves.....	202
	Relief Valve Assessment and Selection	203
	Relief Valve Model.....	205
	Surge Pressure Analysis	212
6.4	<i>Sequence Valves</i>	213
6.5	<i>Counterbalance Valves</i>	216
	Direct Acting Counterbalance Valve	217
	Remotely Controlled Counterbalance Valve.....	219
	Over-center Valve.....	220
	Brake Valve	221
	Counterbalance Valve Model.....	222
6.6	<i>Unloading Valves</i>	232
	Differential Unloading Relief Valve	233
	Unloading Valve Characteristics.....	234
6.7	<i>Reducing Valves</i>	236
	Reducing Valve Model	240
	Reducing Relief Valve	244

6.8	<i>Valve Noise and Cavitation</i>	251
-----	---	-----

7 Flow Regulation

7.1	<i>Flow Regulation Function</i>	257
7.2	<i>Uncompensated Flow Controls</i>	261
	Flow Restrictor Model	264
7.3	<i>Deceleration Valve</i>	266
7.4	<i>Compensated Flow Control</i>	268
	Pressure Compensated Flow Control Valve Model	272
7.5	<i>Bypass Flow Regulator</i>	276
7.6	<i>Priority Valve</i>	279
7.7	<i>Flow Divider and Combiner Valves</i>	281
	Flow Divider Model.....	283
7.8	<i>Positive-Displacement-Metering Valve</i>	288
7.9	<i>Flow Control Circuits</i>	288
	Meter-Out Circuit.....	289
	Meter-In Circuit	291
	Bleed-Off or Bypass Circuit.....	293
7.10	<i>Valve Selection and Specification</i>	300

8 Cartridge Valve Technology

8.1	<i>Cartridge Valve Perspective</i>	303
8.2	<i>Poppet-Type Cartridges</i>	306
	Pilot Pressure Sources.....	309
	Directional Control Configurations.....	312
	Pressure Control Cartridge Valves.....	314
8.3	<i>Spool-Type Cartridge Valves</i>	315
8.4	<i>Cartridge Valve Models</i>	318
	Pilot-to-Close Model.....	318
	Pilot-to-Open Model	320
8.5	<i>Sizing of Cartridge Valves</i>	321
8.6	<i>Cartridge Manifold Design</i>	324
8.7	<i>Applications</i>	325
	Regenerative Machine Tool Feed System.....	325
	Plastic Injection Process Control System.....	328

9 Hydraulic Power Sources

9.1	<i>The Energy Question</i>	333
-----	----------------------------------	-----

9.2	<i>Prime Mover Considerations</i>	335
	Use of Hydrostatic Transmissions.....	339
9.3	<i>Hydrostatic Power Generation</i>	341
	Gear Pumps	342
	Vane Pumps	344
	Piston Pumps.....	346
	Screw Pumps.....	349
	Lobe Pumps	349
9.4	<i>Pumping Models</i>	350
	Gear Pump Model	350
	Vane Pump Models	356
	Axial Piston Pump Models.....	359
	Radial Piston Pump Model	366
	Check Valve Piston Pump Model	367
9.5	<i>Pump Characteristics</i>	368
9.6	<i>Pump Application Factors</i>	372
9.7	<i>Functional Aspects of Pumps</i>	376
9.8	<i>Fixed Displacement Pump Models</i>	381
	Lumped Coefficient Model	381
	Performance Coefficient Model	383
	Pump Performance Testing	384
	Determination of Pump Displacement (D_p) and Slip Coefficient (C_s)	385
	Determination of Viscous Shear Coefficient (C_v)	386
	Determination of Mechanical Friction Coefficient (C_f) and Breakaway Torque (T_c)	387
9.9	<i>Noise in Pump Systems</i>	397
9.10	<i>Environmental Aspects of Pumps</i>	399
9.11	<i>Booster Pumps</i>	400
	Centrifugal Pump	400
	Eductor or Jet Pump.....	410

10 Energy Storage and Transformation

10.1	<i>Introduction</i>	417
10.2	<i>Energy Storage—Accumulators</i>	418
	Weight-Loaded Accumulators	419
	Spring-Loaded Accumulators.....	419
	Gas-Loaded Accumulators	420
10.3	<i>Gas-loaded Accumulator Sizing Criteria</i>	421
10.4	<i>Accumulator Selection and Application</i>	438
	Auxiliary Power Source	438
	Flow Pulsation Dampener	440
	Pressure Surge Absorber.....	442
	Temperature Change Considerations	446

10.5	<i>Accumulator Assessment</i>	449
10.6	<i>Energy Transformation Devices</i>	450
10.7	<i>Intensifier Application Factors</i>	455
10.8	<i>Intensifier Assessment and Selection</i>	458

11 The Conduit System

11.1	<i>The Role and Types of Conduits</i>	461
11.2	<i>Connector Seals</i>	462
11.3	<i>Conduit Connectors</i>	463
11.4	<i>An Overtorqued Connector Case</i>	468
11.5	<i>Rigid Conduit—Piping</i>	472
11.6	<i>Rigid Conduit—Tubing</i>	474
11.7	<i>Flexible Conduit—Hose</i>	481
	Improper Hose Application.....	484
	Improper Hose Assembly.....	485
	Improper Hose Installation.....	489
	Environmental Protection.....	491
	Severe Operational Duty Cycle.....	492
	Corrosivity of Elastomers.....	492
	Damaged/Faulty Hose Assembly	493
	Hose Defectively Manufactured.....	493
11.8	<i>Manifolding and Modularizing</i>	498
	En Bloc Manifolding.....	500
	Stacked Valve Method.....	501
	Stacked Subplate Method.....	501
	Drilled Plate Method.....	501
	Sandwich Plate Manifold Method.....	502
11.9	<i>Energy Losses in Conduit Systems</i>	502
	Friction Losses	502
	Minor Losses.....	503
	Equivalent Length	508
	Net Positive Suction Head (NPSH).....	514

12 Seals for Hydraulics

12.1	<i>Introduction</i>	521
12.2	<i>Types of Seals</i>	523
	Contact Seals.....	523
	Clearance Seals	527
	Gasket Seal.....	528
12.3	<i>Mechanics of Sealing</i>	529
12.4	<i>Elastomer Technology</i>	532

Abrasion Resistance	533
Oil/Seal Compatibility	534
Compression Set	534
Corrosivity	534
Material Creep	534
Crystallization	535
Elasticity	535
Extrusion	535
Fatigue	535
Friction.....	535
Hardness.....	536
Stress Relaxation.....	536
Tear Resistance	536
Tensile Strength	537
Thermal Expansion	537
Permeability	538
Aging.....	538
<i>12.5 Seal Design and Selection Notes.....</i>	<i>538</i>
Lip Seal Notes.....	538
O-ring Notes.....	539
Face Seal Notes.....	540
Elastomer/Design Interaction.....	542
<i>12.6 Linear Seal Considerations.....</i>	<i>543</i>
<i>12.7 Cylinder and Piston O-ring Seal Force Model</i>	<i>548</i>
<i>12.8 Hydraulic Seal Models.....</i>	<i>554</i>
Theory of Hydraulic Sealing	554
Reciprocating Seal Model.....	556
Rotary Seal Model	562
Hydraulic Sealing Criteria.....	564
Appendix A—Glossary of Hydraulic Terms.....	567
Appendix B—Fluid Power Symbols	589
Appendix C—Hydraulic Test Standards	601
Appendix D—FPRC/OSU Orifice Flow Nomograph	613
Appendix E—Tables of Conversion Factors.....	617
Bibliography.....	621
Index	627
